WORK EXPERIENCE

Analyst DBS Bank

09/2019 - Present

Hyderabad, India

Full Stack Developer

- **Designed architecture of a multi-tab based web application** with Angular, Angular-Material and NgRx for back office Forex trading operations, enabling users perform multiple tasks simultaneously.
- Led a team of 2 & successfully migrated entire existing project features to new Angular application in **less than 2 months**.
- Designed a **highly configurable dashboard system** which enables users to get stay up-to date with task queues and perform frequent tasks or navigate to actionable page.
- Several instances of doing optimizing/refactoring of codebase leading to substantial effect in performance both in front and back end.
- Reduced response time of an api from over **10 seconds to ~100ms** by extending JPA and making count of a pageable query optional.
- Developed SDLC tracker with Angular and Ngx-admin to collect data on Applications currently under development from several sources & a customizable survey targeted for application owners, enabling management to easily track current stats based on several parameters, in broader as well as detailed overview.

IT Analyst TCS

07/2016 - 09/2019

Hyderabad, India

Front end Developer

- Led a team and developed front end templates/components with JQuery, knockoutJS & bootstrap for an AEM project.
- Developed a documentation management for physicians, enabling them to pre-configure templates with set of questions based on their needs and getting fully dynamic form of *custom data types* to record patient data during consultancy.
- Received several recognitions and awards for performance throughout the tenure.
